

is seeking a

Research Analyst
Permanent Position

Metrolinx is responsible for leading the planning, development, implementation and financing of an integrated multi-modal transportation network for the Greater Toronto and Hamilton Area (GTHA). Taking a regional approach, Metrolinx will bring together the province, municipalities and transit authorities to produce long-term, economically and environmentally sustainable transportation solutions.

The Investment Strategy and Projects business area is responsible for developing a financially sustainable Investment Strategy and Capital Plan, as well as assessing and developing the first major capital projects for implementation.

Working with a team of committed and dedicated individuals and reporting to the Manager of Investment Strategy and Projects, you will facilitate policy, planning and project development with transportation stakeholders, municipal partners, and provincial ministries. Responsibilities will include research and analysis and to provide input and advice on a number of topics, such as:

- Triple-Bottom Line Cost-Benefit Analysis of transit projects
- Prioritization of major transit/transportation investments
- Capital Planning
- International best practices in public sector capital investment
- Policy development

Utilizing your experience and interest in working within multi-disciplinary project teams on urban transportation issues you will be a valued team member for the further implementation of the Metrolinx Regional Transportation Plan for the GTHA. You will assist in the development of reports, briefing materials and presentations. You will work with the team to resolve issues, identify precedent setting or innovative concepts in transportation project analysis and implementation relative to the Metrolinx mandate.

Location: 20 Bay Street, Toronto

Qualifications:

Demonstrated knowledge and experience in transportation research, economic, financial and policy analysis. An understanding of transportation modeling and project development processes is viewed as an asset, as well as knowledge of current transportation policies, planning, programs, legislation and directions. Thorough understanding of land use planning and multi-modal transportation theory and issues; environmental issues and processes; economic theory/principles; and linkages with provincial and stakeholder transportation issues. Strong planning, analytical/problem-solving, project management, negotiation, research, consultation and facilitation skills. Excellent oral and written communication, presentation and stakeholder management skills. Working knowledge of the current provincial and municipal legislative milieu including the Places to Grow Act, Planning Act, Environmental Assessment Act, Public Transportation and Highway Improvement Act, Highway Traffic Act, Development Charges Act, and other Acts or regulations that apply to Metrolinx

undertakings would be considered an important asset.

Salary is commensurate with experience.
