

RESEARCH ANALYST

\$59,506 - \$74,744 per annum (Salary Range under Review)

with an excellent benefits package, including OMERS Pension Plan

Metrolinx requires an individual to conduct research and analysis related to the development of the Metrolinx Investment Strategy and for the assessment and implementation of major capital projects. In this role, you will liaise with stakeholders, municipal partners, and provincial ministries, to facilitate investment, policy, planning, and project development activities. You will exercise your top-notch research skills to provide current, detailed, and up-to-date information regarding emerging policy issues and to provide advice and analysis on a range of transportation, public finance and infrastructure investment topics. Being able to take this information and condense it into reports and presentations that can be understood and utilized by a variety of audiences is a key requirement. You are as comfortable with grass roots research in the trenches as you are with making sophisticated presentations to senior management.

Location: 20 Bay Street, Toronto

Qualifications: Completion of a 4-year university program in one of Urban Planning, Applied Sciences, Transportation, Business, Economics, and Public Administration is required. A graduate degree in one of the above would be considered an asset. Minimum 4 years experience in transportation planning and/or analysis in support of large-scale transportation related projects that includes direct exposure to, or demonstrated working knowledge of:

- Theory and principles of the economics, financing, planning, and modeling of multi-modal infrastructure and the use of, and impact on, the surrounding lands, environment, social, and economic structure
- Project planning, assessment, and evaluation
- Analytical methods and techniques
- Design, development and assessment of studies
- Gathering, analyzing, and modeling data
- Understanding of the regional and local transit system
- Metrolinx Regional Transportation Plan and Project Evaluation Framework.
- Communications with a variety of stakeholder groups, including the presentation of proposals, and provision of advice
- Strong computer skills including the use of statistical analysis software applications for the analysis of data, preparation of reports, and the development of graphical presentations

Any combination of education, training, and experience deemed equivalent. Less qualified candidates may be considered on an underfill basis.

Applications or resumes must be received by the Human Resources Office, Metrolinx, 20 Bay Street, Suite 600, Toronto, M5J 2W3, email: humanresources@gotransit.com, no later than **September 23, 2009**, quoting **File Number 09-202**.

Only those selected for an interview will be contacted.
