

# Notice for Shoring Wall Construction

Mid June 2020

## What work is taking place?

As part of the construction of the Davenport Diamond Grade Separation Project, the constructor will be installing a temporary shoring wall as a part of initial construction work. This wall will support the diversion track which is constructed next to the open excavated pit.

## WHEN

The work is scheduled to start in mid June and last for approximately five weeks. Please note these dates are tentative, and work could be rescheduled due to weather conditions.

## WHERE

Shoring wall construction will take place within the rail corridor between the CP rail corridor and Davenport Road.

## WORKING HOURS

This work is scheduled to take place in the corridor from 7 a.m. to 7 p.m. on weekdays.

Noise levels will be higher during drilling operations for the installation of piles, which is expected to last for approximately nine days. The work will comply with the allowable noise limits as per the Metrolinx contract. We apologize in advance for any inconvenience, and we'll make every effort to minimize disruption as much as possible.
