

FINCH WEST LRT – Transforming Transit in Your Area

Construction Notice

Information as of November 28, 2019

What is the Finch West Light Rail Transit (LRT)?

The Finch West LRT is a light rail transit project that will bring 11 kilometres of modern, reliable rapid transit to northwest Toronto. It will have 18 stops, including 16 surface stops, plus an underground interchange station at Finch West subway. A below-grade terminal stop at Humber College will connect to other local transit services like GO, Miway, Viva, and Züm. The Finch West LRT will provide rapid transit for the Jamestown, Rexdale and Black Creek neighbourhoods, as well as vital connections between communities and supporting growth in northwest Toronto.

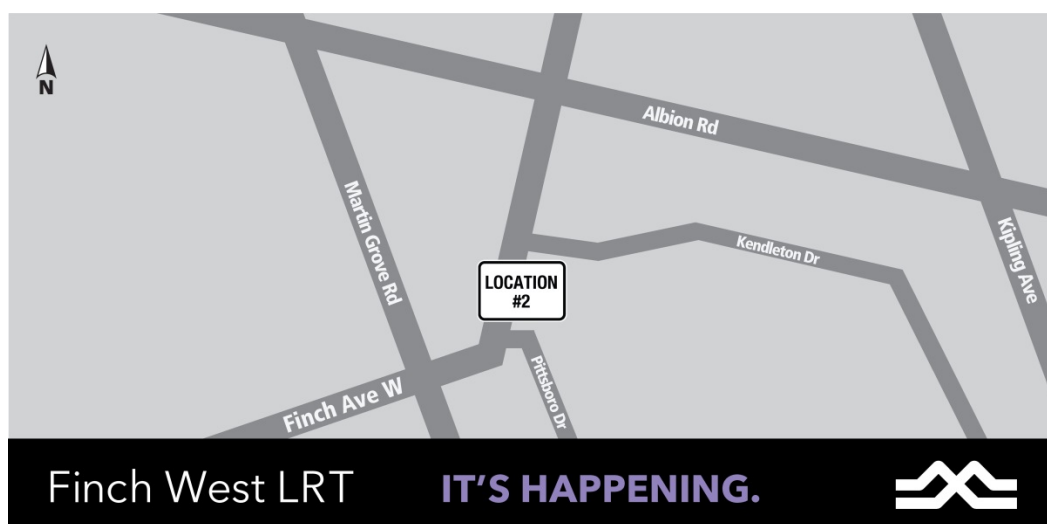

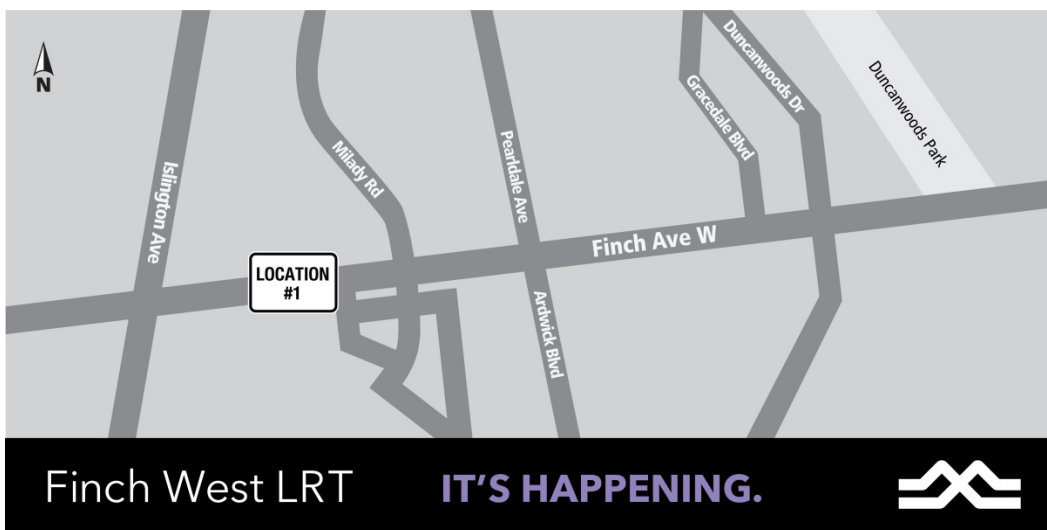

Overnight Noise and Vibration Notice December 2019

What:

In December 2019, a crew will conduct an environmental exercise in your area to measure vibration levels. There may be some noise and vibrations associated with the work. The work will take one evening and/or night, weather permitting in close proximity to the locations highlighted in the below maps.

- Location #1 between Islington Ave. and Milady Rd. along Finch Ave.W.
- Location #2 between Martin Grove Rd. and Kendleton Dr. along Finch Ave. W.

As part of the LRT project, the contractors must estimate vibration levels that will be caused by construction and by light rail vehicles travelling along the proposed Finch West LRT alignment. It is unlikely the vibration levels during construction activities for the Finch West LRT Project will affect nearby buildings; however, to minimize impacts, the constructor is taking steps to identify the vibration thresholds based on nearby buildings, structures and utilities.

FINCH WEST LRT – Transforming Transit in Your Area

Construction Notice

Information as of November 28, 2019

Hours of Work:

- Overnight from 5 p.m. to 5 a.m.
- December 2019. It may occur on one evening/night before the end of 2019, depending on weather conditions

What to Expect:

- Temporary installation of multiple sensors in your area, in close proximity to the highlighted locations in the maps:
 - Location #1 between Islington Ave. and Milady Rd. along Finch Ave.W.
 - Location #2 between Martin Grove Rd. and Kendleton Dr. along Finch Ave. W.
- Vibration from a crew dropping a 50 kg weight multiple times on a portable impact testing rig that will be placed near the centre of the LRT line. This will take place one evening/night before the end of the year.
- If you have a business in the area, it is suggested that you take extra precautions with business operations and equipment that are sensitive to vibrations.
- If you live in close proximity to the locations, you may want to temporarily remove wall hangings and pictures that could fall and be damaged from these potential vibrations.
- Some vibration and/or noise, which may be experienced as a dull thud.
- There might be several short-term closures, around one (1) minute duration each in close proximity to the locations during this exercise.
