

FINCH WEST LRT – Transforming Transit in Your Area

Construction Notice

Information as of December 5, 2019

What is the Finch West Light Rail Transit (LRT)?

The Finch West LRT is a light rail transit project that will bring 11 kilometres of modern, reliable rapid transit to northwest Toronto. It will have 18 stops, including 16 surface stops, plus an underground interchange station at Finch West subway. A below-grade terminal stop at Humber College will connect to other local transit services like GO, Miway, Viva, and Züm. The Finch West LRT will provide rapid transit for the Jamestown, Rexdale and Black Creek neighbourhoods, as well as vital connections between communities and supporting growth in northwest Toronto.

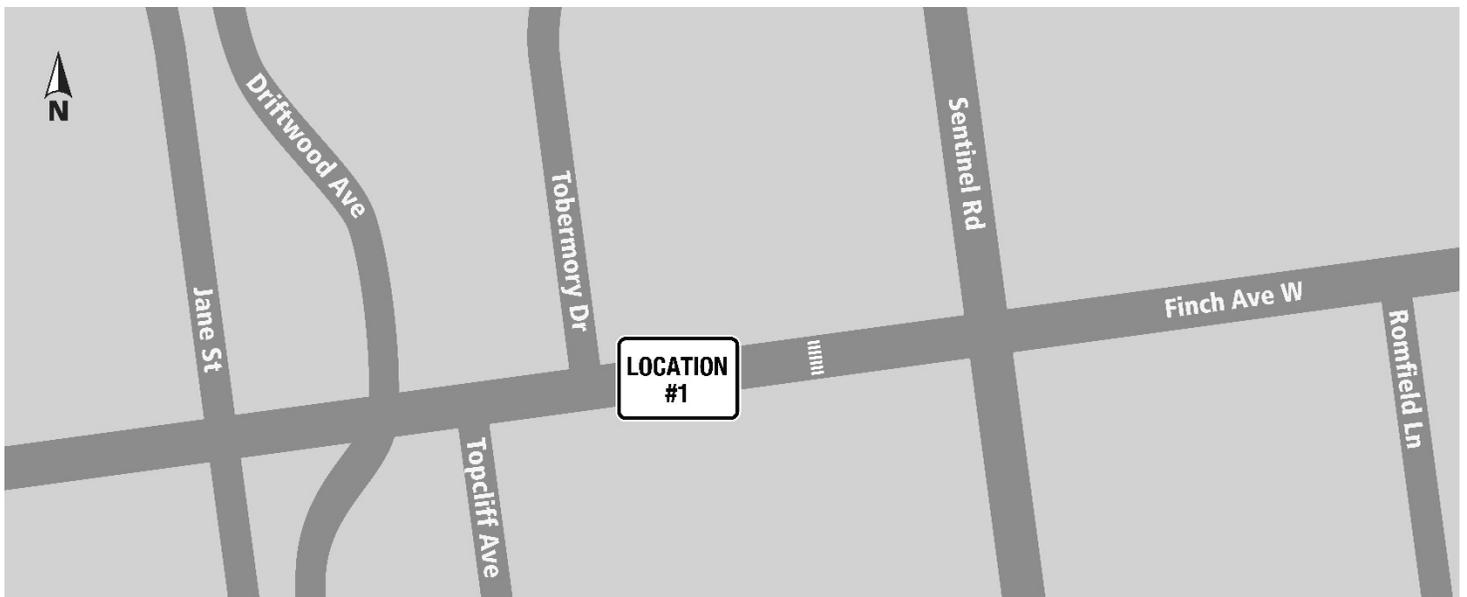

Overnight Noise and Vibration Notice December 2019

What:

In December 2019, a crew will conduct an environmental exercise in your area to measure vibration levels. There may be some noise and vibrations associated with the work. The work will take one evening and/or night, weather permitting in close proximity to the location highlighted in the below map.

- Finch Ave. W. east of Tobermory Dr. in front of the York Woods Public Library.

As part of the LRT project, the contractors must estimate vibration levels that will be caused by construction and by light rail vehicles travelling along the proposed Finch West LRT alignment. It is unlikely the vibration levels during construction activities for the Finch West LRT Project will affect nearby buildings; however, to minimize impacts, the constructor is taking steps to identify the vibration thresholds based on nearby buildings, structures and utilities.

Finch West LRT

IT'S HAPPENING.

FINCH WEST LRT – Transforming Transit in Your Area

Construction Notice

Information as of December 5, 2019

Hours of Work:

- December 12, 2019; however, it could be postponed to take place on December 17, 2019, depending on weather conditions.
- Overnight from 9 p.m. to 7 a.m.

What to Expect:

- Temporary installation of multiple sensors in your area, in close proximity to the highlighted location in the map:
 - Finch Ave. W. east of Tobermory Dr. in front of the York Woods Public Library.
- Vibration from a crew dropping a 50 kg weight multiple times on a portable impact testing rig that will be placed near the centre of the LRT line. This will take place the evening/night of December 12, 2019 or December 17, 2019.
- If you have a business in the area, it is suggested that you take extra precautions with business operations and equipment that are sensitive to vibrations.
- If you live in close proximity to the location, you may want to temporarily remove wall hangings and pictures that could fall and be damaged from these potential vibrations.
- Some vibration and/or noise, which may be experienced as a dull thud.
- There might be several short-term closures, around one (1) minute duration each in close proximity to the locations during this exercise.
