

TRANSFORMING TRANSIT IN YOUR AREA

Lorne Park Road-Rail Crossing Closure

Construction Notice - April 2019

GO Expansion involves improving, updating and modernizing our infrastructure, including tracks, bridges and stations to ensure that we can increase service and connect you to our region, today and tomorrow.

It also involves extensive maintenance efforts to ensure that our services run safely and efficiently.

LOCAL PROJECT

During the **May 17 long weekend** we will close Lorne Park Road at the rail crossing to perform rehabilitation works. Both the tracks and the road surface have deteriorated and require replacement.

This work will improve the conditions for vehicular, bicycle and pedestrian traffic in the area and extend the life span of the crossing for up to 8 years.

WHAT TO EXPECT

Lorne Park Road will be closed between Birchview Drive and Albertson Crescent from 9:00pm on Friday, May 17, until 4:00am on Monday, May 20, 2019.

Construction will take place around the clock starting Friday night until the following Monday morning. We will be excavating, removing and replacing asphalt and railway tracks throughout this closure.

Due to the complexity of the work, it requires the full closure of the road and can only be carried out during off-peak times when there is less or no train traffic.

Nearby residents may also notice night-time construction noise and lighting as well as crews moving up and down the tracks. We regret any inconvenience this may cause.

We recognize that this work can be disruptive to residents and will do our best to carry out the work and reopen the road as quickly as possible.
