

# Investigative night drilling work on Lakeshore West Rail Corridor, near Exhibition GO

Beginning July 15, 2020

## What is happening?

To advance design concepts and other structural plans for the Ontario Line, Metrolinx will be using small drill rigs to gather information and evaluate underground conditions. Using this information, Metrolinx can begin to determine the construction approach for this project.

## WHAT TO EXPECT

- Residents and businesses near the work site can expect to hear noise caused by a drill rig, trucks and other construction equipment related to this work.
- Every effort will be made to minimize disruptions and expedite work.

## TIMING

- Work will occur overnight from 8 p.m. to 6 a.m., Monday to Friday. Work is expected to last for the duration of the year.
- Actual drilling will be sporadic over this time period because drilling will not be required every night.
- Work is being done at night to minimize disruptions to rail traffic on the corridor.
- Work could be rescheduled and delayed due to weather conditions or any unforeseen circumstances.

## What is the Ontario Line Transit Project?

The Ontario Line will connect communities with 15.5 kilometres of transit service, making it faster and easier for hundreds of thousands of people to get where they need to be each day. It will also help alleviate congestion on transit and roads by providing 17 new connections to GO trains and TTC service.
