

Gas Line Relocation for Finch West Light Rail Transit - September to November

The Finch West Light Rail Transit (LRT) is an 11km LRT running along Finch Ave. West between Keele St. and Humber College. The Finch West LRT will replace 35 peak period buses, increasing capacity and reliability of service along the route, while significantly reducing travel times for transit users on the corridor.

What: As part of the work for this project, Enbridge Gas Distribution (Enbridge) has begun relocating natural gas pipelines along the Finch West LRT route.

Why: To accommodate the construction of the new Finch West LRT, Enbridge is required to move the natural gas pipelines from the centre of the roadway (the proposed location of the new track-bed) to the south side of Finch Ave. West.

When: Starting in September 2017, Phase 3 will begin on a section of Finch Ave. West from Islington Ave. to east of Milady Rd. The work is expected to take approximately three months to complete. Some work may be rescheduled due to weather conditions and any unforeseen circumstances.

Where: Phase 3 will start at the intersection of Islington Ave. and Finch Ave. West, and will extend approximately 400m east, just past Milady Rd. The majority of work will take place on the south side of Finch Ave. West but will affect traffic in both the eastbound and westbound lanes.

Transit Information

For the safety of transit riders, TTC bus stops in the affected area will be relocated as required. Watch for additional signs directing pedestrians.

Pedestrian and Traffic Details

Due to the current volume of traffic in this area, traffic delays are expected during construction. For the duration of this work, both east and westbound lanes will be reduced to one lane in each direction.

Please take care when travelling near construction areas. Pedestrian walkways will remain open but we ask that you watch for additional signs directing pedestrians, as detours may be required.

Work Hours

Most of the work will be carried out between 7:00 a.m. and 7:00 p.m., Monday to Saturday. In certain situations, some late night and/or early morning and/or Sunday work may be required. The Enbridge contractor will not always work during the extended hours, but may do so at their discretion.

We thank you for your continued patience as we work to build this important project.
