Subject: There's a better way

Dr. Mr Wright et Al.,

I am writing to express my concern and objection to the raised guideway/expressway that Metrolinx has planned to build across Eglinton Flats significantly effecting the surrounding parkland, playground , bike / walking trails, tree canopy, and wildlife including endangered and species at risk.

Keep the track buried into Mount Dennis as you are doing through Etobicoke . At the very least keep it at grade in the roadway.

To date no reasonable response or explanation has been given to the community as to why a raised guideway is the preferable option. I would appreciate an explanation so I can gain a better understanding, as at the moment this attach on green space feels random and cruel.

I urge you to reconsider your plans and revisit less intrusive options.

Thank you,

Sincerely,

Tanya Connors
