

CP Bridge Girder Installation: Bolting and Tensioning at CP Diamond - Overnight Work

November 8-12, 2021 (five nights)

What work is taking place?

Crews will be finishing up the current overnight work required for the girder installation for the new CP bridge over the CP Rail tracks. The work involves installing any remaining floor beams, followed by bolting and tensioning everything together.

When

Monday, November 8 to Friday, November 12 (five nights).

Where

The CP Diamond train intersection (north of Dupont Street).

Hours

Approximately 11 p.m. to 6 a.m.

**Please note that dates and times are approximate, and work could be rescheduled. For regular construction updates, please sign up for our Toronto West weekly newsletter by visiting our website at www.metrolinx.com/davenport or follow us on Twitter @GOExpansion.*

Why night work

This work is being done overhead and very close to the track. Therefore, it must be carried out overnight when trains are not running to keep workers and train operations and passengers safe.

What to expect

Local residents can expect construction activity, noise, and lights at the CP Diamond. Crews will be using a crane and manlift to carry out this work.
