

Antler Street: New Duct Bank Installation for Future Power Feed to the Davenport Diamond Guideway

November 29 to December 20, 2021

What work is taking place?

To provide future power feed to the Davenport Diamond Guideway, we must install an underground duct bank on the south side of Antler Street, along the north side of Campbell Park. The work involves excavating and installing the new duct bank. It will take crews approximately two to three weeks to complete, and road occupancy will be required for construction equipment and to accommodate the build. This is new infrastructure, not a relocation. There will not be any power outages.

When

From November 29 to December 20 (approximately three weeks).

Where

On the south side of Antler Street, along the north side of Campbell Park.

Hours

Monday to Friday, approximately 7 a.m. to 7 p.m. Some weekend work may be required.

**Please note that dates and times are approximate, and work could be rescheduled. For regular construction updates, please sign up for our Toronto West weekly newsletter by visiting our website at www.metrolinx.com/davenport or follow us on Twitter @GOExpansion.*

What to expect

Local residents can expect construction equipment and construction activity on Antler Street, between Campbell Avenue and the rail corridor. Additionally, local residents can expect curb lane occupation, reduced parking, and one-way local traffic at a time. Access will always be maintained.
