

# Temporary Davenport Diamond Installation & Diversion Track Tie-In

**Update:** September 9 to 16, 2020 (Extended Overnight Work)

## What work is taking place?

Over the September long weekend, crews tied the diversion track into the main line and installed a temporary diamond at the GO Rail / CP Rail intersection to align with the new track. While Barrie GO trains are running successfully on the new diversion track, some additional welding and destressing work needs to be carried out overnight while trains are not in service. Crews initially anticipated this would be done by September 9, but due to unforeseen circumstances, must continue working overnight to complete the work.

## When

The work is scheduled to take place during night shifts between Wednesday, September 9 and Wednesday, September 16. This includes overnight work on Wednesday, September 9, Thursday, September 10, and Friday, September 11 into the morning of Saturday, September 12. The overnight work will resume after the weekend on Monday, September 14 and Tuesday, September 15 into the morning of Wednesday, September 16.

\*Please note work could be rescheduled.

## Where

Most of the work will take place at three points along the rail corridor: 1) just north of Bloor Street; 2) just north of Davenport Road; and 3) just north of Dupont Street at the CP diamond. However, ancillary work will take place along the entire diversion track, including south of Bloor Street. All site access points will be used: Bloor, Wade, Paton, Wallace, Antler, Campbell, Caledonia and Foundry.

## Hours

This work will take place overnight for the duration of the work period.

\*Please note these times are tentative, and work could be rescheduled.

## What to expect

The work being performed is significant. Residents can expect bright lights at night, loud noise due to heavy rail equipment and operating machinery (cranes, dozers, welders and grinders), and vibration. These disturbances can be expected at any time during the night.

**We appreciate this may cause an inconvenience to residents in the area and our crews will continue to make every effort to minimize disruption where possible. When we work overnight, our crews are always looking to reduce the level of disruption to the local community.**
