

Phase II Environmental Site Assessment

August 22- September 14, 2022

The Eglinton Crosstown West Extension is one of four new subway projects that will transform transit in our region; getting hundreds of thousands of people where they need to be, better, faster and easier than today.

WHAT WORK IS HAPPENING HERE?

The Phase II Environmental Site Assessment (ESA) will consist of drilling 10 boreholes to a depth of 10 metres for the purpose of installing 50mm diameter monitor wells along the Eglinton Avenue West from Weston Rd to Scarlett Rd. A rubber tire/track-mounted drilling rig will be used to advance the boreholes and install monitoring wells for soil and groundwater environmental sampling.

HOURS OF WORK:

- Staff will be onsite from August 22, 2022 through September 14, 2022 from 7am to 7pm, Monday to Friday.
- Work may be rescheduled or extended due to weather conditions or unforeseen circumstances.

WHAT TO EXPECT:

- Traffic delays due to lane reductions. Only one of the two lanes in the northbound direction of Scarlett Rd and westbound of Eglinton Ave W will be occupied during the 9am to 4pm closure time on weekdays between August 22 and September 14th due to drilling.
- One lane in each direction will be open at all times for traffic.
- A minimum of 3.5m of clearance width per open lane on the road will be maintained, per minimum clearance width guidelines.
- No rush hour occupation will take place.
- All lanes will be fully open and made safe outside of working hours.
- Noise impacts are expected from the use of the drill rig (engine noise). Additionally, back-up beepers, a vital safety measure, will be limited to essential work only.

PEDESTRIAN IMPACTS:

- No sidewalk closures, and a minimum 1.5 metre width pedestrian walkway on sidewalks or around work zones will be maintained at all times.
