

Subsurface Utilities Engineering work at Islington Avenue

September 19-30, 2022

The Eglinton Crosstown West Extension is one of four new subway projects that will transform transit in our region, getting hundreds of thousands of people where they need to be, better, faster and easier than today.

WHAT WORK IS HAPPENING HERE?

In support of the Eglinton Crosstown West Extension (ECWE) project studies and existing conditions documentation, Metrolinx is undertaking Subsurface Utility Engineering (SUE) work. This work involves investigating, documenting, and mapping existing underground utility networks such as pipelines and cable lines, and retrieving information on existing conditions to determine when and how to relocate subsurface utilities. This work reduces the likelihood of existing utilities being damaged by new construction projects.

HOURS OF WORK:

- Staff will be onsite between September 19 and September 30, 2022 from 8am to 4pm, Monday to Friday
- Work may be rescheduled or extended due to weather conditions or unforeseen circumstances.

WHAT TO EXPECT:

- There will be no major property or pedestrian impacts associated with this work.
- No tree or vegetation removals are required for the work.
- Sidewalks within work areas to be maintained.

IMPACTS:

- One lane on Islington Ave. will be occupied by staff, vehicles, and equipment during site for a short period of time per day.
