

TRANSFORMING TRANSIT IN YOUR AREA

FINCH WEST LIGHT RAIL TRANSIT (LRT)

Information as of September 2018

Gas Line Relocation for Finch West Light Rail Transit

The Finch West Light Rail Transit (LRT) is an 11km LRT running along Finch Ave. West between Keele Street and Humber College. The Finch West LRT will replace the 36A buses, increasing capacity and reliability of service along the route, while significantly reducing travel times for transit users on the corridor.

What: As part of this project, Enbridge Gas Distribution (Enbridge) will be relocating natural gas pipelines along the Finch West LRT route.

Why: To accommodate the construction of the new Finch West LRT, Enbridge will be relocating some natural gas pipelines on Finch Ave. West.

When: Work that's currently in place on Finch Ave. West between Duncanwoods Dr. and the railway bridge east of Weston Rd. is now expected to be completed by the end of November. Some work may be rescheduled due to weather conditions and unforeseen circumstances.

Where: The work will take place on the north and south sides of Finch Ave. West between Duncanwoods Dr., extending east of Weston Rd. Traffic will be affected in both directions on Finch Ave. West for the duration of the work.

Transit Information

For the safety of transit riders, TTC bus stops in the affected area will be relocated. If required, additional signage directing pedestrians will also be installed.

Pedestrian and Traffic Details

During construction, lane reductions or short-term road closures may be required. Driveways will remain accessible to residents. Plazas with multiple entrances may have one or more entrance temporarily closed at certain times during construction. However, at least one entrance will remain open at all times.

Please take care when travelling near construction areas. Pedestrian walkways will remain open. Please watch for additional signs directing pedestrians, as detours may be required.

Due to the current volume of traffic in this area, traffic delays are expected during construction. Signage will be posted in affected and surrounding areas to indicate road closures and traffic delays.

Work Hours

Most of the work will be carried out between 7:00 a.m. and 11:00 p.m., 7 days a week. Overnight work may be required to reduce the impact to local traffic.

For more information about this natural gas line relocation work, please contact Enbridge at 416-495-4809 or enbridgegasmedia@enbridge.com.
