

Geotechnical Investigation North of St. Clair W. Rail Crossing – Weekend, Day & Night Work

Aug 27 - 29, 2021 & Sept 10 -12, 2021 (Weekends - Day & Night)
Sept 13-17, 2021 (Days)

What work is taking place?

Metrolinx will be conducting geotechnical investigation on the Kitchener rail corridor, north of St. Clair Avenue West. This work will include the drilling of a total of seven (7) boreholes and the installation of monitoring wells. Please see the map on previous page where the yellow dots represent the approximate location of each borehole.

Where?

On either side of the Kitchener Rail Corridor, north of St. Clair Ave West.

When?

August 27 to 29 **AND** September 10 to 12, 2021: Five (5) boreholes will be drilled on the west side of the tracks.

September 13 to 17, 2021: Two (2) boreholes will be drilled on the east side of the tracks.

What Hours?

Weekend work will take place both during the daytime and nighttime hours.

Weekday work will take place during the daytime hours.

**Please note that dates and times are approximate, and work could be rescheduled. For regular construction updates, please sign up for our Toronto West weekly newsletter by visiting <https://bit.ly/3iGp9PZ> or follow us on Twitter @GOExpansion.*

Why night work?

The drilling is taking place very close to the track and so the work must be carried out at night when trains are not running.

What to expect?

Nearby residents can expect to hear intermittent noise and feel minor vibrations from the drill rigs. There will be construction lighting during the night works for safety purposes, but these lights will be angled to avoid any potential disturbances to the residents.
