

TRANSFORMING TRANSIT IN YOUR AREA

Overnight Investigative Work – Egan Avenue/Kimridge Avenue

NOVEMBER 2018

Metrolinx, an agency of the Province of Ontario, is working to transform the way the region moves by building a seamless, convenient and integrated transit network across the Greater Toronto and Hamilton Area (GTHA). Over the next 10 years, Metrolinx is transforming the existing GO rail system to deliver a whole new rapid transit experience to your community. With more frequent train service you'll have more options to get you where you need to go.

New Track

150 kilometres of new dedicated GO track will allow for more uninterrupted service.

New Trains

New electric trains will travel faster for longer and reduce travel times.

New Bridges and Tunnels

Bridges and tunnels that eliminate intersections with rail and road traffic will provide more reliable GO train service.

New Renovations

New and improved stations will make your journey more comfortable, from start to finish.

THE LOCAL PROJECT

Metrolinx has begun a multi-year construction program to expand and improve the existing GO Transit service network. Increasing GO service in both directions means adding a new fourth track and expanding infrastructure, followed by electrifying parts of the network. This geo-technical study requires the drilling of boreholes and testing soil conditions. Boreholes will be drilled within the rail corridor and beside the rail corridor. The borehole work will be completed at night due to heavy rail traffic operating during the daytime.

When: The borehole work will be completed Sunday to Thursday nights starting Sunday, November 18 through to early January 2019. This overnight work will be completed from 10:00 p.m. to 6:00 a.m. These dates are subject to work force and site conditions.

Where: The work will take place along the Lakeshore East Rail Corridor at two locations: 1) at the end of Egan Avenue (west of Jones Avenue) within the rail corridor and 2) on Kimridge Avenue (east of Warden Avenue). The work will start at Egan Avenue and then move to Kimridge Avenue. There will be temporary lane restrictions on Kimridge Avenue while this work is underway. This work will consist of construction noise generated from a drill rig, a generator and from trucks moving and beeping. We recognize that this work can be disruptive to nearby residents. The work crew will work to mitigate any noise and vibration where possible.

We are committed to keeping local residents and businesses informed about construction activities and can be reached at the contact information below. Thank you for your continued patience.
