

# Early Works: Investigative work continues at Burloak Drive

Starting Late October 2022 to Late December 2022

*An aerial image showing the work zone. The work zone depicted is approximate and for illustrative purposes only.*

## PROJECT INFORMATION

Metrolinx's GO Expansion program is delivering more GO service across the network, including trains every 15- minutes or better on the Lakeshore West Rail Corridor. To support GO Expansion, we are upgrading the rail network and our GO stations to enable more frequent and fully accessible service. To support the increase in GO Service, Metrolinx is working with the City of Burlington and the Town of Oakville to build the grade separation (separation of the rail from the rail corridor) at Burloak Drive. This work will enhance pedestrian and vehicular safety and will optimize traffic flow at this crossing.

## WHAT WORK IS TAKING PLACE?

As part of early works for the grade separation, crews will perform geotechnical testing, utility daylighting, and sewer system inspection works. This work includes installation of vertical boreholes for monitoring of existing soil conditions, protection of nearby utilities by a hydrovac truck, as well as closed-circuit television video (CCTV) inspection of existing sewer pipes. Please see table on the next page for more details.

**Thank you for your cooperation as we work to transform the rail corridor in your area.**

| Construction Activities  | Scheduled Start Date            | Expected Duration                   | Work Hours              | Description of Work  |
|--|---------------------------------|-------------------------------------|-------------------------|--|
| Geotechnical Testing & Sampling  | Late October/<br>November 2022  | Approx. 1 Week                      | Overnight Shift         | Crews will use a track mounted drill rig to drill one borehole at a time for soil investigation within the rail corridor.  |
| Utility Daylighting and pre-construction investigative works                                     | Late October /<br>November 2022 | Approx. 2-4 weeks<br>(intermittent) | Day/<br>Overnight Shift | Existing underground utilities will be uncovered in small sections using a hydrovac truck. This work is done to locate and record depth for the protection of existing utilities. Each area will be immediately backfilled.  |
| Sewer CCTV Investigation   | November 2022                   | Approx. 2 weeks                     | Day Shift               | Sewers will be inspected from the roadway. Sewer structure lids will be removed, and pipes will be cleaned using a hydrovac truck. A camera will be navigated through the sewer pipes to take footage of existing pipe conditions. Sewer lids will be immediately replaced following the Inspection. |
| * Please note that work may be rescheduled due to weather conditions or unforeseen circumstances |                                 |                                     |                         |  |

### WHAT TO EXPECT?

Residents should expect some noise, vibration, dust, and site lighting. Our operations staff will take reasonable precautions to minimize disturbances to residents and commuters, including but not limited to the following:

- No idling of non-essential equipment
- Pointing lights away from residential windows
- Work area will be safely delineated

### HOURS OF WORK

- Day work is expected to take place Monday to Friday between 7:00 a.m. and 5:00 p.m.
- Overnight work is required for safety when there is less train activity and is expected to take place Monday to Saturday between 7:00 p.m. and 5:00 a.m.

### TRAFFIC & PEDESTRIAN DETAILS

- Short-term partial lane traffic impacts are anticipated during this work.
- Increased construction vehicles and equipment can be expected in the work area.
- Pedestrians will not be impacted at this time.
- Please exercise caution around active construction sites.
- Access to driveways will be maintained at all times.

### COMMUNITY ENGAGEMENT

Metrolinx has a dedicated community engagement team in place who works with residents and businesses in the Halton Region.
