

Surveying on Carlaw Avenue, Riverdale Avenue, and Langley Avenue

Starting as early as November 22, 2021

What is happening?

MetroLinx will be locating and measuring underground utilities using hand-held monitoring equipment. Using this information, MetroLinx can begin to determine the construction approach for the Ontario Line project.

Timing

- **Scheduled start:** November 22, 2021
- **Duration:** Up to three weeks
- **Days:** Monday-Friday
- **Hours:** 8 a.m. - 5 p.m.

What to expect

- A one or two person crew will use hand-held monitoring equipment to locate and measure utilities in the field and apply paint markings on the ground to note physical locations of underground utilities.
- Utilities are located within the public right of way. The limits of the road or sidewalk do not always match up with the limits of the public right of way. At times, utility location markings may be visible on sidewalks, driveways and front lawns.
- Crews will avoid entering private property to the extent possible and will work from municipal plans.
- Every effort will be made to minimize disruptions and expedite work.
- Work may be delayed or reschedule due to inclement weather or unforeseen circumstances.

The Ontario Line

15.6 kilometres of transit service

Making it faster and easier for hundreds of thousands of people to get where they need to be

Over 40 new connections to GO train lines and existing subway, streetcar, and bus lines.
