

Installation of sidewalk overhead protection at Corktown early works site

Starting as early as March 16, 2022

Timing

- **Scheduled start:** March 16, 2022
- **Duration:** Three days
- **Days:** Weekdays
- **Hours:** 7 a.m.- 6p.m.

What to expect

- As part of ongoing demolition works on the south site of the future Corktown Station, sidewalk overhead protection will be installed for the north-west corner of the south side (map above depicts north and south sites) to protect the public during the demolition of the building.
- **Pedestrian sidewalks** in this area will need to be **temporarily closed** so the sidewalk overhead protection can be installed.
- This will result in the **closure of the curb lanes on Front Street East and Berkeley Street** so that pedestrians can be diverted.
- Safety barricades and signage will be put in place to ensure pedestrian and vehicle safety.
- Work may be delayed or rescheduled due to weather conditions or unforeseen circumstances.
- Additional early works construction details and timing will be shared as plans proceed.
