

Tree removals & overnight demolition at Exhibition early works site

Starting as early as March 11, 2022

What is happening?

MetroInx will be preparing the site surrounding Exhibition Station for upcoming early works construction activities, which will include the removal of some trees on this site.

Early works construction will put infrastructure in place to help keep people moving through Exhibition Station during future Ontario Line construction.

Timing

- **Scheduled start:** March 11, 2022
- **Tree Removals:** four weeks
- **Hours:** 7 a.m. - 6 p.m.
- **South Platform demolition:** five days
- **Hours:** 7 p.m. - 5 a.m.

What to expect

- The arborist report completed for early works at the Exhibition Station site identified 49 trees to be removed to clear the perimeter of the work zone. A total of 116 trees were inventoried at the Exhibition site.
- The report for the Exhibition site was completed by a certified arborist from the International Society of Arboriculture (ISA). A qualified arborist will supervise all work undertaken within the minimum Tree Protection Zone and direct construction workers as required.
- Preparatory activities to get ready for early works construction at Exhibition are continuing with the demolition of the south platform at Exhibition Station.
- Residents and businesses near the work site can expect to hear noise caused by trucks and other construction equipment. No impact on pedestrians, traffic or road access is expected.
- We will coordinate work to ensure GO customer impacts are kept to a minimum, including completing work during off-peak hours and ensuring that there are always accessible paths.

The Ontario Line

 15.6 kilometres of transit service

 Making it faster and easier for hundreds of thousands of people to get where they need to be

Over 40 new connections to GO train lines and existing subway, streetcar, and bus lines.
