

Overnight Signal Bridge Work

Weekend of September 3-6, 2021

August 27, 2021

What's Going On?

Upcoming Weekend Work - Signal Bridge Installation:

Metrolinx will be performing signal bridge installation in the vicinity of Yonge Street. This nightly work will be done from Friday to Monday between the hours of 8 p.m. and 8 a.m.

Dates may change according to conditions. Safety first.

How Will You Be Affected?

Heavy machinery such as a crane, boom trucks, and corridor lighting will be used. Metrolinx is working with subcontractors to mitigate impacts by using white noise backup beepers. Due to the nature of the installation, some lighting impacts will be experienced by adjacent condominium dwellers on lower floors.

USRC Signalling System Project Overview

The USRC Signalling System Project is designed to improve reliability of our signalling and train control systems and will replace the functionality of locally controlled towers at Cherry, Scott, and John Streets.

Early works continue in preparation for new signal bridges at various locations within the Union Station Rail Corridor. Construction and enabling works are estimated to be completed in late 2022.
