

Union Station Enhancement Project

GO Expansion

GO service is expanding to serve you better - with more frequent service, more stations, cleaner technology, and more connections. Across the entire network, our goal is to deliver over 10,000 train trips a week - so you won't need a schedule because you know the next train will be coming soon. GO Expansion will transform the GO rail network from a commuter service into an all-day, rapid system.

Work has already started at Union Station to get you where you need to go, better, faster, and easier.

Project Overview

There are multiple projects underway at Union Station - all working toward the same goal - preparing the Union Station Rail Corridor for GO Expansion service levels.

The Union Station Enhancement Project (USEP) is being completed in phases to deliver the required infrastructure needed to enable two-way, all-day service every 15 minutes or better along core segments of the GO rail network.

The USEP includes the design and construction of transit infrastructure and upgrades at the southernmost part of Union Station.

Conceptual rendering of a new south passenger concourse at Union Station. Final Designs are subject to change.

Improvements

Here are some of the improvements we're making today to allow for more trips, more often across the network:

- Two new wider GO train platforms with canopies, which will increase safety and capacity to serve more customers
- New stairs and elevators
- A new south passenger concourse spanning from Bay to York Streets, with convenient open concept connections into existing Bay, VIA, and York Concourses, Union Square and Scotiabank Arena
- Creation of two new south tracks

USEP Quick Facts

- 3.5 years to complete the project
- 2.5 million person-hours to deliver the project
- 130,000 square feet of new building space
- 30,000 cubic meters of structural excavation
- 11,000 cubic meters of concrete
- 5,000 meters of micropiles
- 170 kilometers of cable

Conceptual renderings of new GO train platforms at Union Station. Final Designs are subject to change.

Benefits

- Two new wide platforms with canopies and two new tracks, will increase safety and capacity to serve more trains and get you where you need to go faster.
- A more modernized and convenient open concept south passenger concourse will provide smoother, easier customer connections.

What You Need To Know

- The multiple projects taking place in and around Union Station must be completed prior to the implementation of the major GO service increases planned as part of GO Expansion.

- Metrolinx needs to increase the capacity of the south platforms first and will then re-construct the north platforms at Union Station as part of a future phase of work.
- USEP construction will be ongoing until late 2025.
- Metrolinx will communicate with the local community to ensure they are aware of any construction impacts.
