- III) If a Bidder has not completed any work for Metrolinx for a thirty-six (36) month period preceding the Closing, for the purpose of evaluating the Submission, the Bidder will be assigned a VPR in the Performance Category, which is the straight average of all the VPR's of all vendors who have performed services for Metrolinx for a thirty-six (36) month period preceding the Closing, in this Performance Category.
- IV) The legal name of the Bidder stated on the Form of Tender will be used for determining the Bidder's VPR score in the Performance Category. It is the responsibility of the Bidder to ensure that its proper legal name has been stated on the Form of Tender and matches the legal name used by the Bidder in setting up its legal profile in the Metrolinx MERX Portal. Metrolinx will not accept any requests from the Bidder, after the Closing, to change the legal name provided.
- V) In the case of a Joint Venture where multiple parties will sign the Contract, the VPR under the Performance Category, of each Joint Venture participant, will be added and the average will be applied as the VPR score.
- VI) If any member of the Joint Venture has not completed work for Metrolinx within a thirty-six (36) month period preceding the Closing, Section 1.2(b)(i)(A)III) above shall apply for that member.
- VII) The Bidder's VPR, at the time of evaluating this Phase Two, shall be the VPR used for evaluation purposes. The Bidder's VPR used in the evaluation of this Phase Two can be obtained from the Procurement Representative at the conclusion of this Tender Process.
- VIII) Once VPR scores in the Performance Category are determined for each Submission proceeding to this Phase Two evaluation, each Bidder's VPR shall be evaluated as follows:

1) The following equation shall be applied to determine each Bidder's VPR Score, as follows:

a) " Bidder's VPR (Expressed as a %) / 10 = Bidder's VPR Score"

(ii) Part B - Pricing Evaluation

(A) Tender Document Form: - Contract Prices shall be evaluated for compliant Submissions.

(B) An administrative evaluation shall be conducted of Tender Document Form: - Contract Prices to determine compliance with the mandatory requirements as stated therein and in the Instructions to Bidders. The Total Evaluated Price of each Submission proceeding to Pricing Evaluation shall be evaluated and scored as follows:

I) The Submission with the lowest Total Evaluated Price shall receive the maximum score of ten (10) points for Pricing Evaluation.

II) The following equation shall be applied to other compliant Submissions to determine a score out of ten (10):

$$\frac{\text{Lowest Total Evaluated Price}}{\text{Bidder's Total Evaluated Price}} \times 10 = \text{score out of ten}$$

(iii) Evaluation

(A) The following weightings shall be applied to determine each Bidder's Phase Two Total Overall Score, as follows:

  - II) The VPR Evaluation Subtotal shall be added to the Pricing Evaluation Subtotal to determine the Total Overall Score for the Submission.
    - 1) Total Overall Score = VPR Evaluation Subtotal + Pricing Evaluation Subtotal

- 1.6 The Vendor is responsible to thoroughly review site conditions, prior to the start of each Year of the Contract and to prepare a report, including digital photographs, of any property damage, which might be contentious and somehow attributable to the Work performed by the Vendor, including but not limited to, damage to curbs, catch basins and other maintenance covers, trees, grass/lawn areas, signs/posts, light poles, fences and furnishings (bike racks, benches, fare equipment shelters, display boards, etc.). If any “snow removal related” damage is noticed, the Vendor must make Metrolinx aware of this prior to the commencement of the season, otherwise the Vendor might be held liable for the repairs.
- 1.7 The Vendor shall service multiple locations simultaneously and with separate equipment, material and employees.
- 1.8 All work must be completed in compliance with Laws as stated under General Conditions, Section 3.1, Covenants of the Vendor. This includes Noise By-laws. The Vendor must take necessary precautions to limit the amount of noise while working, for instance, banging a loader’s bucket to empty it or the scraping of a plow along the asphalt. Metrolinx endeavours to be a good neighbour by reducing the level of noise being generated from our operations to adjacent properties.
- 1.9 Metrolinx property, adjacent public and private property must be protected at all times from any activities carried out by this Work. Snow and ice must be cleared without forming a windrow at the point of intersection between the contracted area and adjoining property. The Vendor is not permitted to pile snow on any neighbouring property, nor is the Vendor permitted to access any neighbouring property without prior written approval supplied by the property owner.
- 1.10 All site dimensions, drawings and conditions must be verified At the Place of Work by the Vendor.
- 1.11 All utilities and services shall be located by the Vendor through appropriate authorities prior to commencing work. Damaged utilities and services, resulting from this Work, shall be repaired immediately at the Vendor’s expense and to the satisfaction of the representative of Metrolinx and the utilities involved.
- 1.12 Access to fire hydrants and meters must be maintained.

**SCOPE OF WORK**  
**GENERAL REQUIREMENTS**

- 1.13 All damages exposing hazardous or unsafe conditions must be immediately protected and repaired.
- 1.14 The Vendor shall prevent movement, settlement or damage of adjacent structures (this includes, but is not limited to, curbs, catch basin and maintenance hole frames and covers, fences and guardrails, trees, sod and signage), Metrolinx property and area of work. Any damage of same shall be repaired immediately at the Vendor's expense to the satisfaction of the representative of Metrolinx.
- 1.15 The Vendor shall provide and install markers at culverts, railings, curbs, etc., in order to prevent damage to Metrolinx property during snow removal services (from plow, etc.).
- 1.16 Trees and shrubs adjacent to snow removal areas shall be adequately protected by placing warning markers as applied in Section 1.15 above and wrapped to prevent damage.
- 1.17 All damages caused by the Vendor are to be reviewed jointly with Metrolinx staff at or near the end of each Year. This review process is intended to list and resolve any and all issues in an amicable, professional and prompt manner. When it is determined based on the report submitted at the beginning of the Year that damage has been caused to Metrolinx property or assets, due to the nature of, or directly related to the snow and ice control services provided by the Vendor, the Vendor must complete all repairs by the timelines indicated in "Scope of Work: Service Level Requirements".
- 1.18 All markers must be removed within the timeline indicated in "Scope of Work: Service Level Requirements".

**2.0 Snow Piling and Removal**

- 2.1 Snow is to be piled on soil/grass only under the direction of the Metrolinx Representative.
- 2.2 There is a limited area for piling snow at the Place of Work for each location. Recent experience has shown that snow had to be removed from these locations by the Vendor, and at the Vendor's cost, when the location received more than 2"-4" of snow within a 24 hour period. This estimate does not consider pre-existing piled snow which may necessitate all new snow being removed.
- 2.3 If damage is caused to "green areas" (inclusive of grass, garden beds, trees etc.), due to the application of salt or equipment operating on these stated areas, the Vendor is expected to repair same damaged areas; but no later than May 31 of each Year.

**SCOPE OF WORK**  
**GENERAL REQUIREMENTS**

- 2.4 Under no circumstances are snow pile areas to occupy parking spaces, walkways, bus roadways and any other pavement areas intended for Metrolinx or public use.
- 2.5 The Vendor shall be required for the Removal and delivery to the identified snow storage facility when the snow mounds exceed acceptable levels, as reasonably determined by Metrolinx. Such conditions include, but are not limited to: snow mounds which cover parking spots required for use by patrons, impede safe vehicle/pedestrian traffic and access, block sightlines or traffic control signage, pose an environmental or safety concern.

**3.0 Preventative Materials and Measures**

- 3.1 Salt boxes will be provided by Metrolinx and made available for pick-up by the Vendor by November 1st of each year.
- 3.2 The Vendor will be directed by Metrolinx staff to place these salt boxes at strategic locations, near station buildings or at main pedestrian access points.
- 3.3 The Vendor is responsible to keep ample rock salt inside these boxes, throughout the snow and ice maintenance season.
- 3.4 These boxes are intended to be used by designated Metrolinx employees when the Vendor is not at the Place of Work and icy patches develop or when snow covered walkways are noticed, but only under exceptional circumstances.
- 3.5 Metrolinx staff involvement in icing areas, does not relieve the Vendor of any liability issue related to snow and ice control services and does not relieve the Vendor from its contractual obligations.
- 3.6 Applications of De-icers
  - (a) Metrolinx requires the application of either pre-wet rock salt or Direct Liquid Application (application of salt brine directly to the pavement) to all parking lot areas between snow removal services or after the completion of snow removal services. The Vendor must be able to respond for the application of either product. Though DLA is required by Metrolinx, the Vendor must use an infrared thermometer calibrated for asphalt to ensure asphalt temperature is negative seven (-7) degrees centigrade or greater. The amount of DLA used must be reported on the “Vendors Winter Maintenance Work Report”.
  - (b) When snow removal is required at the Place of Work during A.M. or P.M. commuter hours, priority shall be given to Clearing snow as follows:
    - (i) When more than 2.5 cm (1 inch) is expected to fall within the hour preceding the commuter service period, snow and ice clearing and

## **SCOPE OF WORK GENERAL REQUIREMENTS**

the application of pre-wetted salt shall continue using extreme caution to ensure public safety. The Vendor must not obstruct or delay commuter and vehicular traffic at these locations, resulting from snow clearing and ice control services.

- (c) Metrolinx reserves the right to establish and modify the service and work site operating schedules. Modifications may include the addition/deletion of operating hours or days; and/or the length per day of operating hours. The Vendor shall adjust his schedule accordingly upon receipt of notification by Metrolinx, ten (10) days in advance, with no additional cost to Metrolinx.
- (d) When possible, depending on the timing of the precipitations and lowering temperature, all snow removal and ice control services must be completed at least 30 minutes prior to the start of daily bus service. When this is not possible, due to late precipitation falling near station peak periods, the Vendor must focus its attention first on servicing walkways, barrier free parking spaces, barrier free curbs (drop curbs), emergency access routes, main roadway arteries and Kiss & Rides. Then return to the park and rides, after the peak operating period, to complete the snow and ice control service.

### 3.7 De-Icers

- (a) Direct Liquid Application (DLA)
  - (i) All salt brine will be supplied and delivered by the Vendor and guaranteed to be available when needed. The Vendor shall also be responsible for the application of the salt brine at the Place of Work.
  - (ii) The brine is to be stored at the Vendor's site.
  - (iii) DLA should be applied prior to the accumulation of frost, snow or ice, followed by Plowing and/or spreading operations where weather and/or pavement conditions warrant. Once applied it may be effective for a period of up to three days if not removed by weather. When required it must be applied to 100% of the surface area.
  - (iv) DLA material is to be applied at the rate of 2.28 to 3.5 litres per 100 square meters when snow or freezing rain is anticipated and at a rate of 1.71 to 2.28 litres per 100 square meters when frost is anticipated.
  - (v) DLA for frost shall not be completed if any of the following criteria are expected.

**SCOPE OF WORK**  
**GENERAL REQUIREMENTS**

- (A) Pavement temperatures are expected to remain above 2 degrees centigrade continuously for the next 72 hours.
  - (B) Pavement temperature is lower than -7 degrees centigrade during the application.
  - (C) Pavement temperature is expected to fall below -15 degrees centigrade at any time within the next 24 hours.
  - (D) Non-freezing rain is forecast in the next 24 hours .
  - (E) Snow or ice has already accumulated on the pavement surface.
- (vi) The DLA in anticipation of snow and/or freezing rain shall be completed as close to the beginning of the precipitation as possible to a maximum of eight (8) hours.
- (vii) The DLA in anticipation of snow and/or freezing rain shall not be applied if:
- (A) The pavement temperature is lower than -7 degrees centigrade or is expected to be below -7degrees centigrade between the time of application and the start of precipitation.
  - (B) Snow and/or ice has already accumulated on the pavement surface .
- (b) Pre-Wet Salting
- (i) Salt shall be spread as required to maintain bare pavement conditions, being mindful of the adverse environmental effects of over-salting.
  - (ii) Any excess accumulation or accidentally dumped salt must be immediately removed by the Vendor and swept up at the Vendor's expense. Metrolinx will determine excess accumulation or application of salt and will request the Vendor to clean up excess salt.
  - (iii) The actual amount (e.g. # of tons) of salt and DLA applied at the Place of Work must be recorded on the Vendor Winter Maintenance Work Report for each service provided. These reports are to be electronically submitted to Station Operations East team no later than 7 business days after month end. Metrolinx may allow the use of sand in exceptional circumstances, if allowed by Metrolinx. The

## SCOPE OF WORK GENERAL REQUIREMENTS

quantity of sand (e.g. # of tons) must be recorded in the same fashion as salt.

### 4.0 Changes in the Scope of Work

- 4.1 The Scope of Work as shown on the Snow Removal Plan under Attachments may be revised during the Contract. Revisions may be necessary to increase or decrease the Scope of Work to include expanding or reducing the work site as well as including a new area (for example, a new parking area) proximate to the work site.
- (a) Using the following formula, the contract will be amended as follows:
- (i) The applicable Year “Subtotal” found under Contract Prices of Articles of Agreement, (excluding taxes), for the affected Location will be divided by the original total number of square meters of the affected Location under this Contract, to determine a per square meter unit price for this service. This price will then be multiplied by the revised total number of square meters to determine the amended Total Contract Price. This will apply to each remaining period of the Contract, as and if required, to determine the amended Total Contract Price.
- 4.2 Should the change in Scope of Work, due to construction (expanding or reducing the Scope of Work), impede the Vendor’s ability to pile snow at this location, Metrolinx will not incur additional costs for this as the Contract clearly specifies that the Client (Metrolinx) may at any time request for snow to be removed from our site.
- 4.3 Should the change in Scope of Work, due to construction (expanding Scope of Work) result in the construction of a gravel parking lot, the Vendor is to use the formula specified above.
- 4.4 Metrolinx may increase, change location, or decrease the number or type of furnishings, signs and posts in the Work area. These include, but are not limited to, directional, prohibitive (accessible parking, no parking, no entry, scooter parking) and reserved parking signage. For *example*, Metrolinx maintains a reserved parking program, which allows customers to pay for their own reserved parking spot. Each one of these spots may contain a signpost. During the course of this Contract it may be necessary to increase the number of preferred parking signposts at this location. Metrolinx will not incur additional cost for this initiative.

**SCOPE OF WORK  
GENERAL REQUIREMENTS**

**5.0 Monitoring and Record Keeping**

- 5.1 The Contractor shall maintain such accurate records relating to the Work, including daily reports describing equipment used, staffing levels and type of work, as may be required to substantiate all invoices submitted to Metrolinx for payment. Before invoices will be paid, Metrolinx requires complete and accurate records for the period being invoiced. The Contractor is to complete Form No. 0139 entitled “Contractor Winter Maintenance Work Report” as provided in Appendix “D”, **every time they provide a service under this Contract**. The Form must be completed accurately, in detail; and in full (signed and dated) and submitted to Metrolinx, in order to qualify for payment for the respective period of Work.
- 5.2 Good record keeping is essential for minimizing Vendor liability and for optimizing winter maintenance practices. By monitoring the effectiveness of different materials and application rates in relation to pavement and weather conditions, areas for improvement can be identified. Tracking salt use also allows the Contractor’s progress in the implementation of BMPs to be more accurately assessed.
- 5.3 The Vendor shall keep and maintain detailed records to track the times service was delivered and upon request, provide this detailed information to the Contract Administrator. It is advised/required that the Vendor deploy GPS technology in conjunction with electronic spreader controllers to provide this tracking.
- 5.4 Monitoring and record keeping must include the following in the Winter Maintenance Report:
- (a) Location
  - (b) Date and time of treatment
  - (c) Weather conditions
  - (d) Type of precipitation
  - (e) Air temperature
  - (f) Pavement conditions
  - (g) Extent of snow/ice cover
  - (h) Plowing activities
  - (i) Type and quantity of material placed

**SCOPE OF WORK**  
**GENERAL REQUIREMENTS**

- (j) Snow removal activities
- (k) Amount removed
- (l) Disposal location
- (m) Observed risk areas that could not be treated and why they could not be treated.
- (n) Map of Plowing/salting routes, snow storage if available.

5.5 In addition to winter maintenance activities, the following should also be tracked:

- (a) Fleet characteristics
    - (i) Percentage equipped with electronic spreader controllers
    - (ii) Percentage equipped with pre-wetting
    - (iii) Percentage equipped with DLA
    - (iv) Percentage calibrated annually
  - (b) Staff training
-
